FEED AND FOOD - Appendix A

National Reference Laboratories/Official Accredited Laboratories for microbiological parameters in food

The Danish NRL responsible for microbiological parameters in food and domestic animals has in cooperation with DVFA decided to divide the activities of certain reference methods among 3 Danish official laboratories. For each method or group of methods at the official laboratory, the NRL has appointed additional contact persons. In the table below, the official laboratories and the additional contact persons are listed. When the EURLs arrange meetings and workshops, the NRL will point out the Danish representative(s) among the contact persons.

The EURLs are therefore kindly asked to send any information on activities within their field to the Danish NRL as well as the additional contact persons.
